Detect, Respond, Investigate
Cyberattacks

bce))

Keep your infrastructure **secure 24x7**

Learns "on the job"
Make calculations based on real-world data, with no prior assumptions.

Continual iteration
Adapts its understanding as your environment changes and evolves.

Data agnostic
Works on any data, anywhere, from industrial systems to the cloud.

Data encryption
Autonomous Response stops encryption without impacting normal business operations.

Data exfiltration
Autonomous Response stops attackers from ex-filtrating sensitive data by blocking unusual data transfers.

Lateral movement
Darktrace blocks anomalous connections, meaning the attack goes no further.

24/7 Proactive Threat Notification

Receive expert advice during live attacks
Led by Darktrace's SOC experts
Notify your teams of threats

24/7 Ask the Experts

Experts available in real-time
